

# Does Ghana have solar power plants

## Overview

---

Ghana's President John Dramani Mahama on 6 November 2025 cut the sod for a utility-scale solar park at Agortor in the Dawa Industrial Enclave, launching what developers say will begin as a 200-megawatt private solar installation, the first phase delivering 100 MW by December. Ghana's President John Dramani Mahama on 6 November 2025 cut the sod for a utility-scale solar park at Agortor in the Dawa Industrial Enclave, launching what developers say will begin as a 200-megawatt private solar installation, the first phase delivering 100 MW by December. Ghana has made significant strides in diversifying its energy mix by integrating solar energy to improve energy security, reduce carbon emissions and counter the ever growing energy sector debt! Read about Ghana's energy sector debt The enactment of the Renewable Energy Act 2011 (Act 832) and. The following page lists power stations in Ghana. Maximum installed capacity of 200MW. Often output is less than maximum. "Ghana: Construction of Kpone power plant starts". Archived from the original on 5 March 2016. Retrieved 25 February. Ghana has officially commenced construction on a 200-megawatt (MW) solar power plant, a landmark project aimed at significantly boosting the nation's renewable energy capacity and enhancing its energy security. This shift is not just about keeping lights on; it's about securing a clean, reliable energy source for generations to come. Renewable energy promises to.
