

# Dryer sharing level 2 charger

## Overview

---

Yes, you can use a dryer outlet to charge your EV, but only if you verify compatibility, follow safety rules, and use UL-listed equipment. This supports Level 2 EV charging at up to 24 amps. Check Compatibility & Safety: Verify outlet type (NEMA 14-30/10-30) and breaker (30A → charge  $\leq 24A$ ); use UL-listed adapters or smart splitters; never run dryer and EV simultaneously. Yet, we recognize that sometimes there's a need to utilize an existing socket, like a dryer outlet, in your garage. For your convenience and safety, we've compiled a comprehensive overview and comparison of splitters. All of our products come with a. A level 2 charger requires a special outlet (known as a NEMA 14-50) that can handle high power charging. Dryer outlets are not designed.
