

EU Energy Storage Equipment

Overview

1 GWh of new battery capacity installed in 2025, marking the EU's 12th consecutive record year for battery storage deployment. Since 2020, the Commission publishes yearly progress reports on the competitiveness of clean energy technologies that present the current and projected state of play for different clean and low-carbon energy technologies and solutions. The 2025 report highlighted the urgent need to quickly deploy. 27. Residential installations declined by 6%. EASE will now be known as Energy Storage Europe, with a new identity designed to give the sector a stronger visibility. This transformation marks a significant milestone as the association approaches its 15 th anniversary and reflects the central role that energy storage now plays in Europe's. The European Commission officially introduced the “European Energy Storage Inventory” at the beginning of March 2025-a pioneering real-time dashboard, which for the first time enables a comprehensive and transparent overview of the energy storage landscape in Europe. Discover how cutting-edge technologies like lithium-ion systems are reshaping energy management.

EU Energy Storage Equipment

EU installs 27.1 GWh of battery storage in 2025 as utility-scale

The EU's battery energy storage fleet has grown for the 12th consecutive year, marking yet another record year for new installations. According to a new report from SolarPower Europe ...
