

EU certification of photovoltaic panels

Overview

Equipment deployed in European solar installations must meet stringent standards and certifications to ensure safety, reliability, and performance. Solar panels and associated equipment must carry the CE marking, indicating compliance with EU health, safety, and environmental. Solar panels imported or manufactured in the European Union are subject to various regulations, directives and standards. This guide. The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and increase the possibilities of self-consumption and energy sharing. Ever wonder why some solar panels fly off European shelves while others gather dust?

It all boils down to one magic acronym: CE certification. Without it?

You're stuck outside looking in. This certificate, according to Italian Law, complies to UNI 9177 standard. Standards ensure the quality and optimization of solar.
