

Electric vehicle charging infrastructure maseru

Overview

Led by the Technische Hochschule Ingolstadt (THI) in partnership with the National University of Lesotho (NUL)-ERC, and Technologies for Economic Development (TED), the MaZero project is spearheading Lesotho's transition to electric mobility powered by renewable energy. During a recent kickoff. Most rely on home charging, but only 57.3% of the population has electricity access, with rural areas at just 34. This milestone achievement, part of the #RenewableLesotho programme, marks a significant step forward in the country's journey toward renewable energy and sustainable. The African electric vehicle (EV) charging infrastructure market stands at a pivotal juncture, poised for exponential growth amid global energy transitions and regional imperatives for sustainable development.
