

Electrical flat price of energy storage device

Overview

On average, commercial and industrial energy storage systems cost between \$320 and \$480 per kilowatt-hour (system-level, installed). Medium projects (500 to 1,000 kWh): Approximately \$360 to \$440. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U. The projections are developed from an analysis of recent publications that include utility-scale storage costs.
