

Electricity consumption vientiane

Overview

National electricity consumption on Jreached 1,025bn kWh, breaking the previous record of 1,0019bn kWh on . With the long-lasting heat waves in the Northern region, coal power plants are the major source of electricity generation during 1H24. Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. In the selection box above you can also add or. The latest value from 2023 is 277. 31 billion kilowatthours in 2022. If you prefer to log into your personal account, please sign in below. In recent years, Viet Nam has increased its non-hydro renewable capacity targets in its power development plan, from 9. 4% to 21% of total installed capacity in 2030, and decreased the. - Vietnam's Energy Supply & Demand: Vietnam's energy mix is dominated by coal (54% of electricity, 51% of total energy), with rapid growth in coal plants since 2020 increasing GHG emissions. Total Energy Consumption data is updated yearly, averaging 0. 642 BTU qn from Dec 1980 (Median) to 2023, with 44 observations.
