

# Energy Investment Wind Power Company s power generation hit a new high

## Overview

---

Major corporations and state governments are making record investments in wind and solar projects, reshaping the energy market. With supportive policies and surging demand, renewable energy investment is reaching unprecedented levels, positioning clean power as the dominant force in the next. Global energy investment is set to increase in 2025 to a record \$3.3 trillion despite headwinds from elevated geopolitical tensions and economic uncertainty, a new IEA report says, with clean energy technologies attracting twice as much capital as fossil fuels. However, asset finance for utility-scale solar and onshore wind shrank by 13% compared to 1H 2024, reaching the lowest share of total. A new analysis of solar and wind power shows its generation worldwide has outpaced electricity demand this year FILE - Wind turbines operate as the sun rises at the Klettwitz Nord solar energy park near Klettwitz, Germany, Oct. Global energy investment. The U.
