

Energy company uses 150-foot photovoltaic container

**51.2V
200Ah/300Ah
LiFePO4 battery**

Overview

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container. SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects. Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer.

Energy company uses 150-foot photovoltaic container

ALUMERO systems -- solarfold

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system ...
