

# Energy storage battery per kilowatt-hour

## Overview

---

The cost of battery storage per kWh ranges from \$700 to \$1,300 installed for residential systems and \$125 to \$334 for utility-scale projects as of late 2025. Battery pack prices alone have dropped to a record low of \$70-\$108/kWh, representing a 93% decline over the past decade. For Texas homeowners. Battery sizing is goal-driven: Emergency backup requires 10-20 kWh, bill optimization needs 20-40 kWh, while energy independence demands 50+ kWh. Your primary use case should drive capacity decisions, not maximum theoretical needs. Large-scale procurement allows for better negotiating power with cell manufacturers and spreads the fixed costs of.
