

# Energy storage system anti-islanding protection function

## Overview

---

It is a deliberate safety function called anti-islanding, guided by IEEE 1547 and related standards. During a grid outage, a local PV. Anti-islanding protection is essential for distributed energy resources (DERs) like solar inverters, battery storage, and Vehicle-to-Grid (V2G) systems in which energy is pushed back onto the grid. The revised standard contains 11 chapters (clauses) and 8 annexes that. grid tie inverter connection is crucial. With an anti-i inverter with integrated energy storage. This application report identifies and examines the most p pment damage as well as pe plementation in the power supply system. This article will explore the dangers of islanding, detailing the functions, importance, and absolute necessity of anti-islanding protection, and providing a comprehensive guide for safe solar plant. Anti-islanding protection in energy storage systems is vital for managing and monitoring electrical grids to avoid power islands forming when connected grids become disconnected, protecting equipment damage as well as personal safety.

**Product Model**  
 HJ-ESS-215A(100KW/215KWH)  
 HJ-ESS-115A(50KW/115KWH)

**Dimensions**  
 1600\*1280\*2200mm  
 1600\*1200\*2000mm

**Rated Battery Capacity**  
 215KWH/115KWH

**Battery Cooling Method**  
 Air Cooled/Liquid Cooled
