

# Energy storage warehouse device direction

## Overview

---

To access the Energy Storage Warehouse in Genshin Impact, ensure that the main Core Gear Drive is oriented towards the northwest. Gear Drivetrain is a mechanical puzzle that enables you to go through the four main valves inside the Fortress of Meropide's Abandoned Production Zone. Each chamber is surrounded by a solid ring (shown in red in the image above) with an opening in it. There are three Energy Devices (blue "lamps")—one on the left. The Abandoned Production Zone is a sub-area of the Fortress of Meropide in Genshin Impact. As the guard there warns, it's best to be careful when using this device as people. Energy Transfer Terminals can be used to transfer energy from one device to another.
