

Estonia s PV energy storage solution

Overview

Estonian renewable energy company Freen OÜ has launched a 10 kWh sodium-ion home energy storage solution, designed to integrate seamlessly with both solar panels and small wind turbines. This project, in partnership with energy company Sunly, involves a massive expansion of the existing solar farm with a state-of-the-art. Trinasolar, a global leader in PV and smart energy solutions, has announced the successful signing of a new Battery Energy Storage System (BESS) contract with leading Estonian energy company Sunly for the Raba Solar Park. This article explores the project's goals, technological innovations, and how it addresses grid stability challenges while supporting Estonia's 2030 green energy targets. Learn why this. While PV owners cannot change when the sun produces energy, storage allows them to shift when that energy is delivered to the grid.
