

Eu public charging stations

Overview

As of mid-2025, Europe has over 1 million public EV charging points, more than 150,000 fast DC stations, and expanding megawatt-level capabilities; reflecting the continent's charging infrastructure, technological progress, and expectations for the next decade. ints for electrically chargeable cars and vans, located in public places for public use. It also does not cover hydrogen refuelling stations a ross the EU, required. With 14. This report explores deployment trends, market leaders, EU policy drivers such as RED III, and grid innovations needed to meet rising demand and avoid bottlenecks. This rapid growth reflects both strong EV adoption and the urgency with which governments, utilities, and private operators are investing in. As of December 2024, Europe's public charging network comprised 882,012 operational points. Mature but Still Growing The European EV charging station market represents approximately 25% of the global share, with a steady compound annual growth rate (CAGR) of 29% projected through 2030. Public DC chargers are more common than HPC ones, as they are cheaper to install and easier on the power grid. Back then, EVs could only go as far as chargers allowed, bringing range anxiety and EV mistrust.
