

European solar energy storage cabinet with ultra-large capacity

Overview

This integrated solar battery storage cabinet is engineered for robust performance, with system configurations readily scalable to meet demands such as a 100kwh battery storage requirement. SOFAR Energy Storage Cabinet adopts a modular design and supports flexible expansion of AC and DC capacity; the maximum parallel power of 6 cabinets on the AC side covers 215kW-1290kW; the capacity of 3 battery cabinets can be added on the DC side, and the capacity expansion covers 2-8 hours. Each system is tested at our factory in the Netherlands and meets international and local standards such as UL9540A and PGS 37-1. From residential rooftops to industrial facilities, these robust systems bridge the gap between intermittent solar and wind power and consistent. The European industrial battery storage market is projected to grow at 14.
