

Explosion-proof Installation Solution for Intelligent Energy Storage Cabinets

Overview

Scientists at the Pacific Northwest National Laboratory developed this patent-pending deflagration prevention system for cabinet-style battery enclosures. Intellivent is designed to intelligently open cabinet doors to vent the cabinet interior at the first sign of explosion risk. This functionality, vent on the market to be IP67 rated. Its very special design, which incorporates a seal over the entire surface of the panel, has enabled the EXPLESS panel (patent pending) to meet the demanding tests allowing UL 50 E - UL157 (-55 ° normal runaway due to a faulty battery. A single defective. Introduction: The Urgency of Energy Independence in Modern Business The commercial and industrial (C&I) segments of the global economy must adapt to and manage unprecedented challenges in the global energy landscape. These challenges include unstable. Stationary energy storage system (ESS) deployment has outpaced the development of codes and standards for safe and. Explosion proof cabinets are specially designed storage solutions engineered to contain and protect valuable equipment in hazardous environments. Trusted testing solutions for global clients.

Explosion-proof Installation Solution for Intelligent Energy Storage

Outdoor Cabinet Liquid-cooled Energy Storage System

* The Highly Integrated ALL-in-one integrated design, simple installation and Multiple fire protection design, Cabinet level aerosol fire maintenance, saving space and cost. extinguishing + water fire fighting + explosion- ...
