1075KWHH ESS

Overview

Three types of carp are traditionally raised in Iraq along with limited trials to raise some local cyprinid species. More recently, efforts are made to culture commercial marine species and shrimp due to elevated salinity levels in Southern part of the country. Iraq's Ministry of Water Resources announced on Friday a new strategic policy requiring fish farmers to transition from open pond systems to closed aquaculture systems. In a statement, the ministry explained that the decision comes in response to ongoing water shortages and aligns with its broader. Currently, Iraqi fish production stands at around 200,000 tonnes per year, against a demand of over 450,000. Iraq Aquaculture on the rise with Al Rafedeen Fish - In the heart of Iraqi Kurdistan, in Duhok, an ambitious project is taking shape that is set to redefine the aquaculture landscape in. Despite the turbulent events that Iraq has witnessed over the past decades, there is still some hope for the country's tiny aquaculture sector, according to Hatim Al-Hamdani, the head of the Rawafed Foundation for the Development and Production of Aquatic Life. Hatim Al-Hamdani at a conference held. Aquaculture in Iraq has undergone significant development, transforming from rudimentary practices to modern systems that support food security and economic growth. This sector has shown resilience despite facing numerous challenges, including water scarcity, environmental pollution, Political.
