

Financing for 200kW pv distribution for emergency command use

Overview

This calculator is able to simulate the following financing types: Direct ownership: Institutions, municipalities, foundations, endowments, and non-profits, and commercial enterprise can purchase their solar systems using cash. The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and reliable energy-generation projects and purchases. For business owners and acquirers pursuing private debt or equity, submit your deal for review. NLR's PV cost benchmarking work uses a bottom-up. This high-power, low cost solar energy system generates 200,600 watts (200 kW) of grid-tied electricity with (340) 590 watt Axitec XXL bi-facial model PS590M8GF-24/TNH, SMA Sunny High-power three-phase inverter (s), DC string combiners, 24/7 monitoring. In this case, they are eligible to receive 100% of the electricity.
