

Financing for 2MW Photovoltaic Container Terminals at Ports and Terminals

Overview

The collaborative project covering 7.8 acres with solar panel canopies aims to meet 50% of the terminal's annual energy needs, the bi-state agency said in a release. Award-Winning Project Places Solar Arrays Over Truck Lanes, Above Parking Areas and on Rooftops, Installed with No Interruption to Terminal Operations Photos of Solar Energy Installation are Available Here The Port Authority of New York and New Jersey, Port Newark Container Terminal (PNCT) and the. Phase 2 (2016-18): 5,000+ LEDs, high-efficiency chillers across bridges and terminals. ^7 Key Metrics: Phase 2 saves \$1.35 M/yr; \$27 M total over 20 yr; 3,000 t CO2/yr; no upfront cost via ESCO performance contracts. The design enables that. Port Newark Container Terminal (PNCT) has taken a significant step towards sustainability with the completion of a groundbreaking solar energy project. 2-megawatt (MW) solar generation is divided between 3.8 MW of elevated canopy-mounted arrays over active truck lanes and 3.
