

# Finland Solar Panel Greenhouse Project

## Overview

---

Developed by Solarigo Systems Oy with PVO International, the 95-hectare project features 120,000 panels integrated with existing wind turbines to form a hybrid power plant supporting Finland's carbon neutrality goals. The announcement of a massive, growing solar plant in Finland near the Arctic Circle will not only bring clean, reliable energy to the area on a huge scale but will also prove the viability of clean energy integration. Renewables Finland currently maintains three up-to-date lists and statistics that track the development of solar power in Finland. In the end, 7 projects made it. Simo, Finland, June 18th, 2025 - Sungrow, the global leading PV inverter and energy storage system provider, has supplied 180 units of their SG350HX string inverters to a 70 MWp solar power plant in Simo, Lapland.

## Finland Solar Panel Greenhouse Project

### RENEWFM: EUR 27.5 million supporting 7 solar power plants in Finland

It features the latest solar panel technology, is engineered by experienced Finnish experts, and proves the viability of solar power generation in unique environments.
