

Foreign solar power generation is now blooming

Overview

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global solar installations set to rise to 914 Gigawatts (Gw) in 2030, 57% above 2024 levels. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh. The. The United States and the rest of the world are going in very different directions when it comes to renewable energy, according to two new reports. Renewable electricity generation continues to grow rapidly worldwide, despite recent U. Global solar installations reached nearly 600 GW - an impressive 33% increase over the previous year - setting yet another record.
