

Galvanized carbon steel photovoltaic bracket introduction

Overview

Industry background: As the "skeleton" of photovoltaic power station, photovoltaic bracket is composed of hot galvanized carbon steel, zinc aluminum magnesium, aluminum alloy and other materials of steel and supporting accessories, easy to assemble and economic and durable. Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. Designed for durability and precision, these brackets are engineered to withstand various environmental conditions, from extreme weather to long-term wear.

Galvanized carbon steel photovoltaic bracket introduction

What Is Photovoltaic Mounting Bracket?

As the name suggests, the weather-resistant steel photovoltaic bracket is made of weather-resistant steel through research and development. It has the mechanical properties of high ...
