

Global positioning of solar panels

Overview

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global solar installations set to rise to 914 Gigawatts (Gw) in 2030, 57% above 2024 levels. Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's. The solar panel market is projected to grow from USD 194. 3 billion by 2035, at a CAGR of 8. The Solar Panel Market is estimated to be. In 2024, solar photovoltaic capacity additions surpassed 600 gigawatts, accounting for over 80 percent of the total renewable power installed during that year. 66% during the forecasting period of 2025-2034.
