

# Guinea 2025 Solar Panels

## Overview

---

Guinea has launched a major solar power project to bring clean energy to 72 rural communities and install solar streetlights across 20 urban areas. Supported by the World Bank, this initiative aims to boost the country's energy infrastructure and promote sustainable. The Guinean government has announced a long-term energy strategy focusing on renewable sources of electricity including solar and hydroelectric as a way to promote environmentally friendly development, reduce budget reliance on imported fuel, and to take advantage of Guinea's abundant water. CleanPower Generation is a German company developing renewable energy solutions for sub-Saharan Africa, with its newly approved 84 MW solar project in Guinea being one of the largest independent solar power production projects in West Africa. You can read more. On Tuesday, the Ministry of Energy, Hydraulics and Hydrocarbons (MEHH) took part in the plenary session of the Conseil National de la Transition (CNT), devoted to the examination and adoption of the concession agreement and the power purchase agreement for the Koumaguéli photovoltaic. The solar projects would bring 180 megawatts of new capacity online in a country with a total installed generating capacity of just 1,200 megawatts in 2022. As reported by InfracoAfrica, this first solar plant in Guinea will connect.
