

# High-Efficiency Investment in Energy Storage Containers for Schools

## Overview

---

Applying thermal energy storage helps maximize efficiency and lower operational costs in the K-12 school market. Courtesy: Matern Professional Engineering Understand the impact. The Building Technologies Office (BTO) supports investments by schools and school districts to improve the efficiency and health of their facilities through the Efficient and Healthy Schools Program, enabling equitable access to energy resources and opportunities. Almost 100,000 public K-12 schools. analysis and any errors made are those of the authors alone. This publication was authored by Ed Carley, Senior Program Director, National Association of State Energy Officials (NASEO), and Jasmine Xie, NASEO Senior Program Manager with research and contributions by the National Council on School. A Solar Microgrid is a behind-the-meter (BTM) microgrid that solely relies on solar for energy generation when islanded.
