

# Honduras coal-to-electricity energy storage system

## Overview

---

As Central America accelerates its transition to sustainable energy, the Honduras San Pedro Sula Energy Storage Phase II Project stands as a pivotal initiative. This article explores the project's technical advancements, economic implications, and its role in stabilizing renewable. Honduras has launched a consultation on regulatory changes to its electricity network to help better integrate energy storage, which it said is key to maintaining the stability, efficiency and sustainability of the network. A three-week public consultation was launched last week (24 July) by the. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Reports consist of 3 components: Overview of electrification in the country, including history, current status, geographic & demographic trends, and future plans. In November 2024, Honduras made waves with its 75MW/300MWh battery storage tender - the energy equivalent of building a 4-hour. Sunpal Solar is expanding its presence in Latin America, introducing its innovative energy storage systems to Honduras. This strategic move aims to tackle the country's high electricity costs and heavy reliance on fossil fuels, building on the company's previous success in Jamaica while addressing.
