

# How about growing ginger under photovoltaic panels

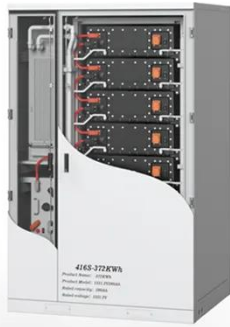

## Overview

---

Potential benefits to the crops will derive from lower plant temperatures, reduced sunburn and improved fruit set. broccoli underneath photovoltaic panels. The panels are positioned 2-3 metres off the ground and sit at an angle of 30 degrees, providing shade and of attracted great attention of researchers. Tomato, lettuce, pepper, cucumbers and strawberries are the most using their land, air and water of his 24. Farmers grow ginger, turmeric, gram, and okra under solar panels in Maharashtra. IT IS TIME FOR SOLAR AND AGRICULTURE, TWO IN ONE BENEFIT. The recent literatures for applications of selective shading systems on the aforementioned crops and others plants are reviewed in the following.

## How about growing ginger under photovoltaic panels

### Growing ginger with photovoltaic panels

The objective of this mini review is to present and summarize the recent studies on the effect of PV shading on crop cultivation (open field system and greenhouses integrated PV panels), with the

### What Crops Can Be Grown Under Solar Panels?

When it comes to the innovative practice of growing crops under solar panels, the possibilities are quite diverse. Farmers in regions like Gujarat, Rajasthan, and Maharashtra in India have been at the ...
