

# How big an inverter should I use for a 170kW solar system

## Overview

---

A 4-6 kW inverter is ideal, depending on the load and surge requirements. Is it better to use one inverter or multiple inverters?

A. A solar inverter should closely match your solar system's output in kW—typically within 80% to 120% of your total panel capacity. Too small = wasted energy

What Is a Solar Inverter and Why Does Size Matter?

Swap out old appliances for energy-efficient ones to cut down your. In this guide, you'll learn what size solar inverter you need, how to size an inverter for solar systems step by step, how panel output affects inverter capacity and also how many inverters per solar panel make sense for different setups without the headache.

## How big an inverter should I use for a 170kW solar system

### How To Size A Solar Inverter in 3 Easy Steps

In this guide, we share 3 easy steps on how to size a solar inverter correctly. We explain the key concepts that determine solar inverter sizing including your power needs, the type and number of ...
