

How do you say use wind to generate electricity in English

Overview

Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning motion of blades, pushed by moving air (kinetic energy) into electrical energy (electricity). Wind is what we call 'clean energy'.

How do you say use wind to generate electricity in English

How does a wind turbine generate electricity? -- Energy

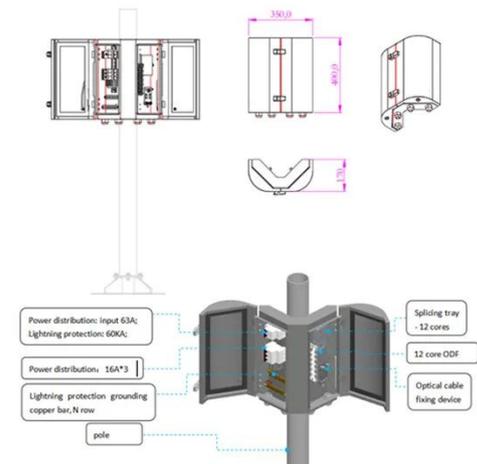

A wind turbine works by catching the energy in the wind, using it to turn the blades, and converting the energy to electricity through a generator in the part of the turbine called a nacelle. While some ...
