

How long is the service life of photovoltaic panels

Overview

Most solar panels are designed to operate efficiently for 25-30 years, which the industry considers their “useful life. Solar panels don't suddenly shut down. They lose power gradually, year after year, until they're no longer pulling their weight. That's the real story behind solar panel lifespan. Not just how long they last, but how well they perform along the way. 5% more electricity over 25 years compared to standard panels, often justifying the higher initial investment through extended productive life and better. Luckily, the lifespan of solar panels will allow you to produce energy for many years, providing a great return on investment.

How long is the service life of photovoltaic panels

How Long Do Solar Panels Actually Last?

Most solar panel companies will provide a standard 25-year warranty for the expected life expectancy of the solar panels. After 25 years, your solar panels won't necessarily need to be replaced; however, ...
