

How many volts does the base station in Eastern Europe have

Overview

In the USA the two commonly supplied shore-power voltages are 120 Volts (60Hz) AC and 240 Volts (60Hz) AC. Mains electricity varies in voltage and AC frequency across the world. North America is the biggest exception. We work with customers worldwide, with many of our most frequent shipments going to Mexico, Ecuador, Venezuela, Colombia, Puerto Rico. Which countries use 240 volts and 50 Hz?

Europe, most of Asia, Africa, and Australia predominantly use 220-240 V, 50 Hz. Europe, most of Asia, Africa. Below you'll find listings for the standards of dozens of countries around the world as it concerns: For example, the U. and Canada standards are 60Hz and 120 / 240V single-phase in homes and 277 / 480V three-phase in commercial or industrial buildings with large loads.
