

# How many watts does a home photovoltaic solar panel have

## Overview

---

About 97% of home solar panels included in EnergySage quotes today have power output ratings between 400 and 460 watts. The most frequently quoted panels are around 450 watts, so we'll use this as an example. But wattage alone doesn't tell the whole story. Most residential solar panels fall into. How many watts a home solar photovoltaic system can generate depends on several factors involving the size of the system, the efficiency of the solar panels, local climate, and solar exposure. It is determined by factors such as voltage, amperage, and number of cells.
