

# How much does a 10W solar inverter cost

## Overview

---

A solar inverter makes up about 10% of the total cost of your solar energy system. The size of your system, the type of inverter, and the efficiency rating affect your final cost. Medium Residential Systems (6-10 kW): You'll likely. Premium Technology Justifies Higher Costs: While SolarEdge systems cost 20-35% more than basic string inverters (\$5,500-\$9,000 vs \$3,000-\$5,000 for residential installations), the module-level optimization delivers 15-25% higher energy production, typically paying for the premium within 2-3 years. A solar inverter costs \$1,500 to \$3,000 total on average for a medium-sized solar-panel system installation. Costs range from \$1,000-\$4,000 depending on type, size, and features.
