

# How much does a 2000 kWh energy storage container cost

## Overview

---

In 2025, the typical cost of commercial lithium battery energy storage systems, including the battery, battery management system (BMS), inverter (PCS), and installation, ranges from \$280 to \$580 per kWh. Larger systems (100 kWh or more) can cost between \$180 to \$300 per kWh. With the global energy storage market hitting a jaw-dropping \$33 billion annually [1], businesses are scrambling to understand the real costs behind these steel-clad powerhouses. These systems are usually behind-the-meter and serve small factories, workshops, commercial buildings, office towers, and shopping. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U. Here is a detailed analysis: 1.
