

# How much does a 200kWh substation user cabinet cost in the US

## Overview

---

A 200kWh cabinet can power 20 American homes for a day or keep a mid-sized factory humming through peak rate hours. But here's the kicker - prices swing wildly between \$28,000 to \$65,000 depending on factors we'll unpack faster than a lithium-ion thermal runaway [1] [9]. Total project ranges: A small, compact distribution substation can start around \$1,000,000 and climb toward \$3,000,000 for modest upgrades. Bigger capacity means a heftier price tag due to larger transformers and components. Primary. Updated: March 2025 In accordance with Attachment A to Decision D. 16-06-052 Unit Cost Guide represents facilities generally required for interconnection. Voltage Level: Higher voltage substations require more robust insulation, larger equipment, and advanced safety features, increasing costs.
