Overview

Statistics reveal that the average cost of building a wind turbine power plant ranges from \$1.2 million per megawatt (MW), with additional expenses incurred for land acquisition, permits, and grid connection. Hidden Costs Are Substantial: The turbine itself. The 13th annual Cost of Wind Energy Review uses representative utility-scale and distributed wind energy projects to estimate the levelized cost of energy (LCOE) for land-based and offshore wind power plants in the United States. Most commercial-scale turbines installed nowadays are 2 MW in capacity and cost between \$3 and \$4 million to install.
