

How much does a wind power pole cost per square meter

Overview

A utility-scale wind turbine costs between \$1.2 million per MW of installed nameplate capacity. Dramatic Cost Range: Wind turbine costs span from \$700 for small residential units to over \$20 million for offshore turbines, with total project costs varying from \$10,000 to \$4,000+ per kW installed depending on scale and location. Commercial Projects Offer Best Economics: Utility-scale wind. The 13th annual Cost of Wind Energy Review uses representative utility-scale and distributed wind energy projects to estimate the levelized cost of energy (LCOE) for land-based and offshore wind power plants in the United States. The average cost of a wind energy project depends on the size of the project (e. how many square feet or square miles the project occupies and how many turbines the project uses), the size of. While costs can vary, they generally hover around \$1 million per MW.

How much does a wind power pole cost per square meter

Economics , Department of Energy

A wind turbine typically pays for itself after a number of years, but it will have high upfront costs. The average cost of a wind energy project depends on the size of the project (e.g. how many square feet ...
