

How to install eight photovoltaic panels

Overview

Learn how to install solar panels step-by-step. This comprehensive guide covers site assessment, mounting, wiring, and inverter setup for residential solar systems. Solar panel installation costs range from \$15,000 to \$30,000 for an average American home, with a payback period of 6 to 10 years depending on your state's incentives and sun exposure. This comprehensive guide walks you through every step of your solar project, from initial assessment to system. So the average American home, which uses about 900 kWh of energy per month, may need around 8 kW of solar to offset its energy usage. That 8 kW (8,000-watt) system would put your all-inclusive cost of going solar at \$32,000. Solar Panels perform at optimum capacity when placed in direct sunlight.
