

Huawei Brazil makes pack batteries

Overview

Huawei Digital Power, Huawei's unit focused on energy solutions and digital infrastructure, has established a Memorandum of Understanding (MOU) with SECPower to expand the commercialization of energy storage systems in batteries (BESS) in Brazil. The company plans to launch its independently developed ultra-fast charging. Even in the face of the suspension of Capacity Reserve Auction (LRCAP), which was scheduled for June 2025, Huawei remains firm in its position in favor of advancing energy storage technology in the country. Our BESS solutions cater to a wide range of clients, from large high-voltage consumers to smaller customers. Our initial focus is on those already. The agreement aims to promote battery energy storage systems (BESS) for the commercial, industrial and agricultural sectors in Brazil, and both companies are optimistic following the recent regulatory advances in the Brazilian electricity sector.

Huawei Brazil makes pack batteries

Storage, e-mobility drive Huawei Brazil strategy

For Huawei, the combination of ultra-fast charging, solar generation, and battery energy storage systems is the key to enabling large-scale electric mobility in Brazil.
