

Install photovoltaic bracket in old tile house

Overview

This article covers everything you need to know about tile hooks, PV hook variations, and how to install a solar panel system on tiled rooftops without compromise. Tile roofs offer excellent structural stability and longevity for solar installations, commonly lasting 50-100 years depending on material composition. Their durability and aesthetic appeal make them ideal candidates for photovoltaic systems, though specialized mounting approaches are required to. In California, approximately 15% of residences have tile coverings, making them a significant factor for photovoltaic setups. At PV Mounts, we've supported hundreds of tile roof. Integrating solar energy systems into heritage structures, particularly older tile houses, presents a unique opportunity that aligns sustainability with cultural preservation.
