

Intelligent Lithium Battery Energy Storage Cabinet for Data Centers

GRADE A BATTERY

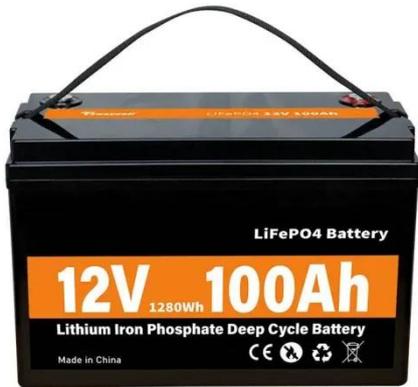

LiFePO₄ battery will not burn when overcharged, over discharged, overcurrent or short circuited and can withstand high temperatures without decomposition.

Overview

These specialized cabinets are engineered to house lithium ion batteries in a controlled environment, providing optimal conditions for battery performance and longevity. The Vertiv™ EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. With advanced. Our new Solition Data Center energy storage system boasts intelligent features, which culminate in safety and reliability, longevity, space savings and easy-to-manage maintenance. Based on Li-ion battery technology, the system supports the mix of new and used batteries and includes a three-level. COLUMBUS, Ohio-- (BUSINESS WIRE)--Meeting the urgent need for solutions supporting high-density computing in increasingly crowded data center facilities, Vertiv (NYSE: VRT), a global provider of critical digital infrastructure and continuity solutions, today introduced Vertiv™ EnergyCore battery. Vertiv EnergyCore battery cabinets save valuable floor space with internally integrated accessories and can be seamlessly paired with Vertiv medium and large UPS systems.

Intelligent Lithium Battery Energy Storage Cabinet for Data Centers

Vertiv introduces fully populated, high power density lithium battery

It provides lifetime onboard data storage, tracking performance over battery charge-discharge cycles, service events and enabling accurate state-of-health reports that can be used for ...
