

# Is it okay to add 36v to a 24v lithium battery pack

## Overview

---

No, charging a 36v battery with a 24v charger is not recommended. Always use the appropriate charger for your battery to ensure safety and longevity. It's not going to be that simple when. Yes, you can mix different capacity lithium batteries, whether a normal 12V 100Ah battery or a Lithium server rack battery. For example: A 12V motor pulling 600W uses 50 amps. Each cell has a nominal voltage of around 3. This mismatch may lead to incomplete.
