

# Is it okay to install photovoltaic panels on the colored steel tile wall

## Overview

---

Professional installation can greatly reduce the risk of damage to the colored steel and improve system longevity. First, assess the structure's integrity to ensure it can support the solar system, followed by selecting appropriate mounting systems tailored for. But is this combination practical?

The short answer is yes - with proper planning. The key numbers: Tiles Recommended?

As EU's new Renewable Energy Directive takes effect this month, requiring 35% renewable. ar panels above the roof can be used to place them on tile roofs. Since tiles may require to be removed to make room for mounts, fixing solar panels to a tile roof may involve some additional labor. The following maintenance practices will help to ensure the long term performance, durability and aesthetic appeal of your COL RSTEEL®; prepainted steel or ZINCALUME®; in BIPV modules instead of glass or conventional backsheets.
