

Is photovoltaic power generation listed on the GEM

12.8V 200Ah

Overview

The Global Solar Power Tracker includes photovoltaic (PV) and solar thermal electricity generating projects. The utility-scale data covers all operating solar farm phases with capacities. A comprehensive online mapping tool that helps to identify areas that are suitable for power generation and other energy-related projects GEM is an interactive web-based decision support system that allows users to locate areas with high suitability for power generation and potential energy. Global Energy Monitor is a NGO that develops and analyzes data on energy infrastructure, resources, and uses. We provide open access to information that is essential to building a sustainable energy future.

Is photovoltaic power generation listed on the GEM

Global Solar Power Tracker Methodology

The Global Solar Power Tracker includes photovoltaic (PV) and solar thermal electricity generating projects. Solar projects for captive industry, including hydrogen production, are tracked.

Global Solar Power Tracker

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar

photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 MW) solar PV data.
