

# Is solar power investment reliable

## Overview

---

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. The cons include high initial costs, specific roof requirements, possible higher property. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. Solar panels have a lot of benefits, but there are also downsides. However, these benefits can come with significant installation and maintenance costs and gains can vary from one house to another.
