

# Is the battery of outdoor base station AP strong

## Overview

---

With a substantial 4000Wh lithium iron phosphate (LiFePO<sub>4</sub>) battery, it boasts expandable capacity up to 48kWh, allowing for versatile energy management. Lithium-ion batteries offer longer lifespan and higher energy density, making them ideal for outdoor base station backup. VRLA batteries are cost-effective for initial investments but require more frequent replacements, increasing long-term costs. My understanding is that they used to use negative 48V DC power, i. 24 2-volt lead acid cells in series, with positive grounded. Today, it's possible to find these telecom batteries, like those made by Victron. Best Lightweight Portable Power Station for Backpacking: Jackery Explorer 240 At Just 6. 5 lbs, this is one of the lightest portable power stations, but it still has enough juice to charge devices and run small electronics.
