

# Is the roof fully enclosed with photovoltaic panels

*LiFePO<sub>4</sub> Battery, safety*

*Wide temperature: -20~55°C*

*Modular design, easy to expand*

*Wall-Mounted&Floor-Mounted*

*Intelligent BMS*

*Cycle Life: ≥ 6000*

*Warranty: 10 years*

## Overview

---

Absolutely, photovoltaic panels can completely cover roofs - but here's the electrifying truth you need to know before turning your attic into a power station. The average US home needs about 20-25 solar panels for full coverage, but wait - it's not. Replacing your entire roof with solar panels isn't the best idea. Tesla's power producing photovoltaic (PV) roofing Tiles are visually indistinguishable from the non-power producing metal or glass roofing Tiles, enabling homeowners the ability to harvest solar energy without aesthetic. These are small solar panels that can be integrated directly into the roof, creating a more discreet and aesthetically pleasing solar system. We analyze installation trends, cost-benefit data, and real-world case studies.
