

Jasolar photovoltaic panels

Overview

JA SOLAR stands for durable, high-performance PV modules that generate first-class energy yields. Business owners can save on electricity costs and earn additional income by using the generated solar power for their own needs and selling the excess back to the grid. As one of the first suppliers with industrial PV production capacity, JA Solar photovoltaic panels are designed to be used in ground-based as well as roof-top installations intended for either commercial or residential purposes. The range offered by the company includes JA Solar monocrystalline solar panels, as well as other accessories for photovoltaic systems, such as high-efficiency solar panels from China's leading Tier 1 manufacturer with 22% efficiency ratings. JA Solar stands as one of the world's top 5 solar panel manufacturers by volume, shipping over 12GW of panels in 2021 as a massive vertically integrated Chinese company producing wafers, cells and modules. Founded in 2007, we are a trusted innovator in renewable energy solutions, dedicated to manufacturing premium monocrystalline, bifacial, and all-black solar panels, complemented by integrated energy storage systems, including high-efficiency inverters and durable battery units. Our commitment to quality is led by Baofang Jin, the founder and chairman of the Board of the company, who led the pioneering entry into the photovoltaic ("PV") industry in 1996, with an initial focus on the silicon rod and silicon wafer business. In 2005, he founded JA Solar to begin manufacturing solar cells. The company was listed on the NYSE.

Jasolar photovoltaic panels

The Leading Solar System & Solar Products Provider Company

It has built a comprehensive new energy industry chain encompassing silicon wafers, cells, modules, energy storage systems, PV power station development and operation, as well as PV materials and ...
