

Kiribati increased renewable energy penetration

Overview

Based on current policies, the share of renewable energy is projected to increase to 11.9 per cent. The Kiribati National Energy Policy (KNEP), established in 2009, serves as a strategic framework to provide accessible, reliable, affordable, clean, and sustainable energy options, thereby enhancing economic growth and improving livelihoods across the nation. While the Ministry of Infrastructure. The population, estimated at 116,445 as of 2023, lives on 21 islands, spread over an ocean area of 3.1 million km². This geographical situation increases the cost of energy and other services, limiting the opportunities for private sector development. As a developing nation in the remote continent of Oceania, Kiribati has distinct economic challenges. Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy. Kiribati Integrated Energy Roadmap (KIER): 2017-2025 comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025. The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the.
