

Kuwait city clean electricity

Utility-Scale ESS solutions

Overview

Kuwait is transforming the desert sun into a new form of currency—clean megawatts, rather than oil. Adel Al-Zamel announced a bold national initiative during a presentation at the GCC Power 2025 Conference in Kuwait City: to increase renewable energy to 15% of the country's power mix. KUWAIT CITY, Nov 10: The Gulf Cooperation Council (GCC) member states have made remarkable progress in power sector integration, with the GCC electricity interconnection project serving as a model of successful regional collaboration, said Undersecretary of the Ministry of Electricity, Water, and. Kuwait is grappling with relentless heat, aging infrastructure and unplanned power outages, prompting major investments in grid reliability. Today, renewables account for less than 1% of Kuwait's electricity generation, but the country aims to grow that to 15% by 2030, with natural gas serving as a. Renewables are mainly used to generate electricity, though renewable technologies can also be used for heating in homes and buildings. Renewable biofuels are also an emerging technology solution to decarbonise parts of the transport sector. More than half of the total electricity generation comes from gas. On the low-carbon side, wind energy contributes. Kuwait on Wednesday declared updating its renewable energy goals and enhancing strategies of energy efficiency, affirming its outstanding role for a zero-carbon future in line with continued commitments to sustainability and renewable energy.
